RE: Equipment Washing – Roadway Stafford, Missouri

We would like to obtain the services of D.S.L. Power Washing (Lot 120 E.V.P., Nixa, Missouri 65714) to wash the exterior of our trucks at our Stafford facility located at 5575 East State Highway 00. D.S.L. Power Washing advises they would wash our trucks, collect the waste wash water, and then transport the waste wash water to the City of Springfield Water Treatment Facility for disposal.

Please advise if your office approves D.S.L. Power Washing's waste wash water disposal procedure and if D.S.L. Power Washing has a permit to discharge our waste wash water into your treatment facility.

I would appreciate receiving your written approval as soon as possible along with a copy of D.S.L. Power Washing's permit, if applicable.

cc: Mike Meyer (417-868-5741 fax)

MEMO

To: Bob Corson, Gene Pabst
From: J. Randall Lyman
Subject: Truck Wash Inspection-For Roadway Express
Date: July 24, 1996

A Mr. Alan Lewis of Roadway Express, 5575 E. State Highway OO, Strafford, MO 65757 at 868-5731 called me and indicated that their corporate offices would like a letter stating that the facilities that wash their vehicles are "permitted and legal". Mr. Lewis stated that their vehicles are washed by Bayless truck wash at 1540 N. West Bypass and Oram Equipment at 2540 E. Livingston. I informed Mr. Lewis that our program was not structured to require a discharge or operating permit for these facilities. I did tell him that we should inspect these facilities to ensure that they comply with our watewater regulations and are discharging to our system before a letter could be sent. I told him that after our inspection, if everything looks alright, you could send them one of our normal "certification" letters indicating that "based on our observations, inspection, etc. that it appears that these facilities are connected to our system and apparently comply with our regulations at this time', or something similar to the USDA letters in the past I suppose. If you have any questions or other ideas, please let me know.
