April 20, 1972 Randy Lyman

A call was taken at 1:45 p.m from a Mrs. Steele at 2235 S. Barcliffe (ph. 883-8628). She said that she saw a man across the street dump oil into a grate in the storm sewer. John Jacobsen and I investigated the problem and found signs where a small amount of oil had been dumped at said place. The storm sewer was traced downstream for some distance (appx. 1/2-1 mi.) and small traces were found all along this distance. The accused party at 2254 S. Barcliff. Dr. is assumed to be Mr. Robt. Reddick (ph 883-1278). The home of the accused party was visited but no one was present. The informant said the accused dumped a pan the size of a dish pan. She wished that her name not be given to the accused as the informant of the dumping.
