Details of Incident: Water In Thompson Branch, At last bridge before entering Lake Springfield, has what appears to be suds on the water. Only in Morning

Action needed: Karen Chandler & I (Gene Pabst) Checked the creek at the last bridge at approximately 9:00 A.M. (1-28-88) It did appears to have a little suds on the water but only on the pond south of the bridge. All the ripples above the bridge had no sign of suds nor did the water in the still pools. We checked the liftstation (Lakewood) and found nothing. We then walked the creek up to where it begins at ? Spring. At no place could we see any suds. We will check it periodically in the future.
