## EXPLANATION TO COUNCIL BILL NO: 2016- 190

FILED: 08-02-16

ORIGINATING DEPARTMENT: Public Works

PURPOSE: Authorizing the City Manager, or his designee, to enter into an agreement with Missouri Highways and Transportation Commission and Nexstar Broadcasting Group, Inc. (hereinafter, "Media Company"), owner of KOLR and KOZL television stations, for the sharing of video from the closed-circuit television (CCTV) traffic monitoring cameras owned and operated by Missouri Department of Transportation (MoDOT) and the City of Springfield throughout the regional roadway network.

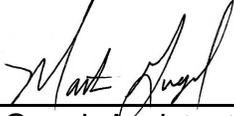

BACKGROUND INFORMATION: This agreement defines the terms under which the City and MoDOT will provide a web-based user account to the Media Company. The user account will allow access to the traffic monitoring video feed through the Transportation Management Center's video distribution software.

The agreement restricts the use of the video feed solely for the purpose of providing travel information to the public and specifically prohibits the Media Company from selling or charging a fee for the video; systematically recording the video for purposes other than traffic reports; misrepresenting the timing and source of the video; misrepresenting the availability of video to others; placing streaming video on websites; and/or showing video of any accident victims or close-ups of emergency response activities. Furthermore, the agreement requires that the OzarksTraffic logo remain visible on all video provided to the Media Company, and that the Media Company verbally acknowledge the source of the video each time it is used on air as "OzarksTraffic cameras" or as "OzarksTraffic cameras brought to you by (or courtesy of) MoDOT and City of Springfield".

This ordinance supports the following Field Guide 2030 goal(s): Chapter 12, Transportation; Major Goal 4, Multi-Modal, Interconnected System The City of Springfield should work within the region to develop, implement, and maintain a multi-modal transportation system that supports jobs, housing, education, accessibility, recreation, clean air, water conservation, and sustainability; Objective 4f, Provide accurate, up-to-date, real-time, user-friendly, and understandable transportation system information which is available to everyone, including first-time visitors and residents, which encompasses all forms of travel. Develop standards for making transportation maps available on the internet, including the use of MapQuest, Google, Yahoo, and other alternative formats, which can be easily updated and made accessible to all users, including the mobility impaired.

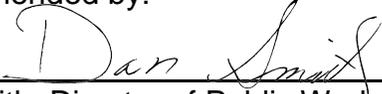

REMARKS: This agreement is an example of the City and MoDOT working together with local media to improve regional traveler information. There is no financial commitment for any of the parties to the agreement. Video access provided to Nexstar Broadcasting Group, Inc. is non-exclusive, and the City and MoDOT reserve the right to allow access to other media companies through similar agreements. Public Works recommends approval of this Council bill.
