

Springfield Area Directory of Environmental Agencies and Organizations

Springfield/Greene County
Choose Environmental Excellence
2008

Welcome to the Springfield Area Directory of Environmental Agencies and Organizations...

...The purpose of this directory is to provide information about government agencies, not-for-profit and member-based organizations serving Springfield and Greene County that are active in protecting the environment. The directory has been compiled by Springfield/Greene County *Choose Environmental Excellence* as a service to the community. The directory will be periodically updated to include new submissions as they are received.

In addition to providing contact information for several environmental agencies and organizations, each listing in the directory also provides information that will allow the user to determine which agency or organization will best meet a particular need.

Additions to the Directory, as well as suggestions for improvement, can be made by submitting information to:

Barbara J. Lucks

U.S. Environmental Protection Agency (EPA)

Branch Region VII

Department Solid Waste

Contact David Flora

Position Program Manager

Address U.S. EPA Region 7
901 N. 5th Street

City Kansas City, KS 66101

Telephone (913) 551-7523

Fax number (913) 551-9523

Web site www.epa.gov/region07/waste/solidwaste

Mission area Solid waste including
disposal, recycling, waste
reduction and composting

Programs available Advisory, regulatory,
public education

Description:

The *Environmental Protection Agency's* solid waste program addresses source reduction, recycling and disposal. The *EPA* Regional Office can provide publications pertaining to all aspects of solid waste management.

U.S. Natural Resources Conservation Services (NRCS)

Branch Greene County Service Center

Contact Mark Green

Position District Conservationist

Address 688 S. State Hwy. B
Suite 200

City Springfield, MO 65802

Telephone (417) 831-5246, ext. 3

Fax number (417) 831-4022

Mission areas Agriculture land use, water
quality, waste, urban conservation
issues

Programs available Technical assistance and
conservation planning

Description:

Formerly the Soil Conservation Service, the *NRCS* provides conservation planning and technical assistance to clients (individuals, groups, and units of government). These clients develop and implement conservation plans to protect, conserve, and enhance natural resources (soil, water, air, plants, and animals) within their related social and economic interests.

Conservation planning is a natural resource problem—solving and management process. The process integrates ecological, economic, and social considerations to meet private and public needs. Conservation planning helps clients, conservationists, and others view the environment as a living system of which humans are an integral part.

NRCS is a Federal Agency under the U.S. Department of Agriculture that works in cooperation with, and provides housing for, the Greene County Soil and Water Conservation District.

Missouri Department of Conservation Nature Center

Branch Springfield Conservation
Nature Center

Contact Linda Chorce

Position Manager

Address 4600 S. Chrisman

City Springfield, MO 65804

Telephone (417) 888-4237

Email Linda.chorce@mdc.mo.gov

Website www.mdc.mo.gov/areas/cnc/springfd

Mission areas Wildlife, fisheries, forestry

Programs available Public education, volunteers

Description:

The Springfield Conservation Nature Center is an interpretive center under the direction of the *Missouri Department of Conservation*. The Nature Center involves the public in nature awareness and facilitates the wise use of resources.

In the exhibit area, visitors are exposed to a variety of natural communities. On the 2.86 miles of trails, they can also experience several different types of wildlife and habitats firsthand. The Center offers educational programming to schools, organizations and the general public year round, and the exhibits are available seven days a week.

Web site www.missouriconservation.org

Mission areas Wildlife, land use

Programs available Advisory, regulatory,
public education, research,
training

Description

The *Missouri Department of Conservation* regulates the state's fish, forest and wildlife resources. This authority includes establishing hunting and fishing seasons, limits and methods, and enforcing wildlife codes. The MDC offers educational programs for schools and at nature centers around the state. Landowner services in areas that include forestry, wildlife habitat development, fisheries, stream stabilization and pond development and management are also offered.

Missouri Department of Conservation

Storm Drain Stenciling Project

Department.....Missouri Department of Conservation

Contact..... Sherry Fischer

Address..... PO Box 180

City..... Jefferson City, MO 65102

Telephone 573-522-4115, ext. 3169

Mission areas..... Water quality, stream stewardship, Watershed education

Programs available..... Curriculum, public education training, volunteers

Web site..... www.mostreamteam.org

Description:

The *Missouri Storm Drain Stenciling Project* involves citizen volunteers in stenciling storm drains with the slogan “DUMP NO WASTE, DRAINS TO STREAMS,” educating the community and cleaning up litter. Qualifying volunteers receive free Storm Drain Stenciling Kits containing instructions, background information, and stencils. A supporting curriculum and video is also available.

Missouri Department of Natural Resources – Air Pollution Control

Branch Southwest Regional Office
Department Air Pollution Control Unit
Contact Paul Vitzthum
Position Unit Chief
Address 2040 W. Woodland
City Springfield, MO 65807
Telephone (417) 891-4300
Fax number (417) 891-4399
E-Mail paul.vitzthum@dnr.mo.gov
Mission areas Air quality
Programs available Advisory, regulatory
Web site www.dnr.mo.gov

Description:

The *Southwest Regional Air Pollution Control Unit* serves the southwest area of the state of Missouri with the exception of the City of Springfield, which has an air quality regulatory agency of its own.

The *Air Pollution Control Program Unit*:

- Provides information about environmental laws and regulations
- Investigates complaints from concerned citizens
- Conducts inspections of facilities that are sources of regulated air pollutants

The Regional office staff works daily with air pollution issues and problems to provide access to the *Missouri Department of Natural Resources Air Pollution Control Program* at a local level.

Missouri Department of Natural Resources – Hazardous Waste Management

Branch Southwest Regional Office

Department Hazardous Waste
Management

Contact Mark Rader
(Hazardous Waste; Waste Tires)

Position Air, Land and Water
Section Chief

Mission areas..... Water quality, environmental
education, watershed
improvement

Programs available..... Curriculum, Storm Drain
Stenciling, Water Quality
Monitoring, Adopt-An-
Access

Description

The Missouri Stream Team Program enables volunteers to help protect and improve Missouri streams. The Program is, arguably, the best in the nation, and is emulated by many other states. Training and equipment is provided for numerous activities including litter pickups, water quality monitoring, educational projects, tree planting, storm drain stenciling, and other projects. The Program is administered by three sponsors: the Departments of Conservation and Natural Resources, and the Conservation Federation of Missouri. There is no cost or obligation to become a Stream Team.

Southwest Missouri Resource Conservation and Development (RC & D) Council

Mission areas Water quality, forestry,
grassland, fire
protection, farm and home safety

On-Going Projects:

- Firewise Education
- Ice Storm Mitigation and Firewise Supplement
- Shoal Creek 319 Grant—Septic System Repairs, Replacements, and Cleanouts
- Shoal Creek MDC Grant—Septic System Cleanouts
- Odorbreak Demonstrations and Workshops
- Windbreak Demonstrations and Workshops
- Ozark Chinquapin Restoration
- Monett Community Foundation – Tree Planting
- Technical Assistance to Forest Landowners
- Woodland Forest Stewardship Shortcourse
- Corn Burner Demonstration
- Feral Hog Education
- South Missouri Water Quality Office
- Assistance to Missouri Association of RC&D Councils
- Assistance to Southwest States Association of RC&D Councils
- Grant Writing Workshops
- Foundation Development Workshops
- Board of Directors Training Workshop
- Facilitator Training
- Keep America Beautiful
- Endowment Campaign

Description:

Southwest Missouri RC&D is celebrating their 40th Anniversary of “Making Things Happen”. This 501(c)(3) nonprofit sponsors projects to improve water quality, fire protection, forestry, and grassland resources.

A forester (funded by the Natural Resources Conservation Service and the Missouri Department of Conservation) is available to work with landowners interested in forest and wildlife management, planting windbreaks, and establishing riparian buffers along streams.

A Firewise Communities Consultant works with Southwest Missouri RC&D to promote Firewise education programs to protect homes, businesses, and natural resources from wildlife.

Description:

The Greene County *University of Missouri Extension* offers youth leadership and community service programs related to environmental issues for young people ages 5 to 18. Adult volunteers guide and support youth activities.

University of Missouri Extension – Environmental Assistance Center

<u>Contact</u>	Marie Steinwachs
<u>Position</u>	Director
<u>Address</u>	University of Missouri, 200 Engineering Bldg. North
<u>Location</u>	Columbia, MO 65211
<u>Telephone</u>	(573) 882-5011
<u>Email</u>	steinwachsm@missouri.edu
<u>Web site</u>	www.missouribusiness.net/eac
<u>Mission areas</u>	Sustainability, waste reduction, pollution prevention
<u>Programs available</u>	Pollution prevention training, interns for industrial P2 research, education, technical assistance

Description:

Since 1991, the University of Missouri Extension’s Office of Waste Management education in pollution prevention and best practices to numerous business sectors from its Springfield, Missouri location. Recently the OWM was integrated into the University of Missouri—Columbia. Now called the Missouri Environmental Assistance Center (EAC), the program combines the capabilities of the College of Engineering and Extension’s Business Development Program.

The EAC offers:

- 1) Pollution prevention assistance for new and expanding business and industries. Our website identifies ways to reduce pollution before it is generated by increasing efficient use of raw materials, energy, water, and other resources through process modifications and better technologies, and by substituting environmentally preferable products, raw materials or packaging.
- 2) Regulatory compliance assistance – what to expect and where to find it in MDNR and EPA
- 3) Financial Assistance – building environmental savings into business plans and loan applications
- 4) Training on how businesses can reduce waste and cost, in partnership with industry sectors. Businesses can learn how to improve operations and reduce waste through better inventory and supply chain management, maintenance and housekeeping, and employee training.
- 5) Access to research and innovation by the University’s Environmental Scientists and Engineer

rgulley@greencountymo.org

Mission areas Solid Waste Mgt./Recycling

Programs available

Design and implementation of waste reduction programs. District “O” has a staff that is trained and dedicated to helping you find solutions to address solid waste issues at your home, work, classroom, business or community. *Grant preparation assistance for financial opportunities is available through the District, as well as other sources.* The District awards annual grants for public and private projects that help meet solid waste reduction goals.

Technical assistance

Educational programs to teach our youth the importance of recycling and preserving our environment.

Recycling Centers in Waste District “O”

Dallas County – Buffalo – 345-2701

Christian County – Nixa, Ozark, Sparta – 581-2112

Greene County – Fair Grove – 759-2353 Willard – 742-3033 Republic – 732-9253

City of Springfield – Several Locations – Recycling Hotline: 864-1904 www.springfieldmogov.org/recycling

Polk County – Bolivar – 327-7956

Webster County – Marshfield, Seymour – 468-2223

Organization Description

In the early 1990’s, the Missouri Legislature divided the State into several solid waste management districts in an effort to reduce the amount of solid waste disposal statewide by 40%.

Solid Waste Management District “O”, formed in 1992, is the result of this State mandate. District “O” includes Dallas, Christian, Greene, Polk, and Webster Counties and the City of Springfield. These entities have been working together for several years to coordinate local environmental efforts, with a commitment to recycling and other waste reduction programs and activities.

An Executive Board consisting of representatives from each member county and the City of Springfield governs District “O” obtaining and sharing information and ideas from county and district advisory boards. The Executive Board works with local residents, businesses, not for profit and governmental organizations to find solutions to solid waste issues. Timothy W. Smith serves as Chair of the Executive Board.

District “O” staff work directly with the Missouri Department of Natural Resources in the administration of various grant opportunities. Grant monies are generated through the tipping fees associated with landfill and transfer station disposal for waste.

Greene County - County Commission

Branch..... County Commission

Department..... Resource Management
Department

Contact Tim Smith, P.E.

Position..... Administrator

Address 940 Boonville Ave.

City..... Springfield, MO 65802

Fax number..... (417) 868-4175

Mission areas Land use, water quality

Programs available Advisory, regulatory, training

Description:

The Greene County *Resource Management Department*, which operates under the direct authority of Greene County Commission, includes the Planning and Zoning Section, Building Regulations Section and the Environmental Section. Areas of responsibility for this department also include General Services and Building Operations & Maintenance for the County Campus.

The Planning and Zoning Section administers land use and subdivision activities in the unincorporated areas of Greene County. This section also deals with growth and development issues and compliance with zoning regulations. The Greene County Geographic Information System maintains the official county zoning map in cooperation with the Planning and Zoning section.

The Environmental Section administers the County’s stormwater, sinkhole, erosion and sediment control, floodplain and on-site wastewater system regulations. This Section reviews proposed development plans and plats for compliance with environmental regulations, performs field inspections and provides information to developers, consultants and the general public regarding environmental issues. The formation of sewer districts within the county is also administered by this Section.

The Building Regulation Section reviews building and site development plans, issues required permits and performs inspections to insure compliance with adopted building codes. Responsibilities also include public health, safety and general welfare. Interacts with builders in an effort to address issues that pertain to our local community.

The administrator of the Resource Management Department is Tim Smith, P.E. Tim also serves as chairman of the Solid Waste District “O” board of directors and is on the State Solid Waste Advisory Board. The Director of the Planning and Zoning Section is Kent Morris, AICP. Kevin Barnes, P.E. is the Greene County Stormwater Engineer and supervises the Environmental Section. Dave O’Dell is the Chief Regulator/ Inspector for the Building Regulation Section, Paula Diggs heads the General Services Section and the Building Superintendent is Dave Dunn.

Telephone (417) 869-6040

Fax (417) 869-6654

Email nicholls@greencountymo.org

Website www.greencountyoem.org

Mission areas Hazardous material emergency
preparedness

Programs available Advisory, regulatory, public
education

Description:

The *LEPC* is the execution arm at the local community level for the Emergency Planning and Community Right-to-Know Act (EPCRA) of 1986. The committee is comprised of representatives from organizations and agencies specified by EPCRA. Its primary responsibility is community hazardous material emergency preparedness. It accomplishes that responsibility by collecting hazardous material information from facilities required to file under EPCRA, develops community emergency response plans to respond to these facilities, and provides hazardous materials training classes to community and business emergency response responders. The LEPC databases hazardous material information it receives and provides that data to emergency response organizations. Plans and facility information are made accessible to the public during business hours. The *LEPC* can take civil action against facilities that fail to comply. Membership in the LEPC is open to the public.

Greene County Soil and Water Conservation District

Address..... 688 S. State Hwy B
City..... Springfield, MO 65802
Telephone (417) 831-5246
Fax number (417) 831-4022
Mission areas..... Land use, water quality,
waste
Programs available..... Advisory, public education,
cost-share

Description:

The Greene County *Soil and Water Conservation District* assists area landowners with the development and implementation of various conservation practices and programs in the county. The district encourages and promotes no-till forage and pasture management, as well as animal waste management. The *SWCD* places high emphasis on education programs for landowners as well as students in the county. Technical advice is provided on many areas including erosion problems, pond sites and construction, and abandoned well sealing. The *SWCD* pays part of the costs necessary for landowners to complete various conservation practices. This cost-share assistance is available for qualifying farmlands. The *SWCD* also has equipment available for rent.

The Greene County *SWCD* works in cooperation with the Natural Resources Conservation Service, formerly the Soil Conservation Service.

Mission areas Solid waste management,
recycling, waste reduction,
composting, household
chemical disposal.

Programs available Advisory, regulatory,
curriculum, public education,
research, training, volunteers

Description:

The City of Springfield’s *Division of Solid Waste Management* is committed to the fiscally and environmentally sound management of Springfield’s “trash” through an Integrated Solid Waste Management System approach. Curbside recycling is provided by private haulers and the following components are provided by the City and funded by the tipping fees paid at the Springfield Sanitary Landfill:

- The *Household Chemical Collection Center* serves non-commercial Springfield residents (located at 1226 W. Nichols) and reuses or recycles over 80% of the materials it receives. It also facilitates disposal assistance for CESQG businesses. Please call 864-2000 for more information.
- The *Yardwaste Recycling Center* provides one-stop shopping by accepting yardwaste and offering high-quality compost and landscaping mulch.
- The *Recycling Centers* are collection centers that accept a variety of recyclables such as newspapers, magazines, glass and plastic bottles, milk jugs, etc.
- *Market Development* is undertaken to increase the availability of a dependable source of recycled materials and to encourage the use of these items in manufacturing. The purchasing of products made from recycled materials helps to “close the loop.”
- *Education* involves working with the community to increase awareness of the value and technology of sound solid waste management practices. Call the Recycling Hotline at 864-1904 for more info.

City of Springfield – Storm Water Services Division

Branch..... Storm Water Services Division

Department..... Public Works

Contact Todd Wagner, P.E.

Position..... Principal Storm Water Engineer

Address 840 Boonville Ave.

City..... Springfield, MO 65802

E-Mail twagner@ci.springfield.mo.us

Telephone (417) 864-1901

Fax number..... (417) 864-1907

Website www.springfieldmogov.org/stormwater

Mission areas storm water quality, flood control

Programs available Advisory, regulatory, public

Description:

The Storm Water Services Division is committed to the development of storm water solutions to meet the needs of the community and to protect the quality of area waterways. The Division provides a variety of services including reviewing plans for all new developments, mapping the storm water system and sinkhole areas, designing projects to reduce flood hazards, and recommending key locations for property acquisition for storm water improvement projects. The Division also administers the City’s federally mandated NPDES Storm Water Permit. Under this permit, the City is developing a Storm Water Management Program to reduce pollution in storm water runoff. Some of the elements of the Storm Water Management Program are:

- Sampling of urban streams
- Field screening for illicit discharges
- Monitoring erosion and sediment control at construction sites
- Best Management Practices for the operation of the City’s roadways and storm water system
- Public education on storm water issues including proper disposal of oil and toxic materials and environmentally-friendly lawn care practices
- Developing public improvement projects that enhance water quality
- Adopt-A-Stream Program

City of Springfield – Industrial Pretreatment Program

Branch..... Sanitary Services Division

Contact Randy Lyman
Position..... Environmental Compliance Officer
Address 1216 W. Nichols St.
City..... Springfield, MO 65802
Telephone..... (417) 864-1925
Fax number..... (417) 864 - 1918
Emailrlyman@ci.springfield.mo.us
Mission areas Water quality
Programs available Public education, regulatory
Web sitewww.ci.springfield.mo.us/sanitary/pretreatment

Description:

The *Industrial Pretreatment Program*, within the Sanitary Services Division of the Springfield Public Works Department, is responsible for the enforcement of Chapter 120 of the Springfield City Code known as the “Wastewater Regulation.” The provisions of this Chapter apply to the discharge of all wastewater into the Publicly Owned Treatment Works (POTW) by providing for the use of POTW, regulations of sanitary sewer construction, control of the quantity and quality of wastewater discharged, industrial wastewater pretreatment, alternate treatment facilities, equitable distribution of costs, assurance that existing capacity will not be exceeded, approval of sewer construction plans, issuance of Wastewater Contribution Permits, minimum sewer connection standards, conditions, penalties, and enforcement provisions for violations of Chapter 120.

Inquiries regarding the use of the POTW, wastewater discharge and pretreatment, Wastewater Contribution Permits, and enforcement of Wastewater Regulations should be directed to Randy Lyman at the above address. Questions relating to sanitary sewer construction, connection standards, charges, and conditions should be directed to Ed Malter at (417) 891-1600, ext. 121. For educational tours of the wastewater treatment facilities and environmental laboratory, contact Tom Holst at (417) 891-1600, ext. 123.

Mission Area(s) Energy services, drinking water,
public transportation,
telecommunications

Programs available..... Plant tours and other educational
outreach programs. Speakers bureau on a
variety of energy, environmental, and
water quality topics. Speakers bureau
contact is Pat Garoutte, 831-8630.

Organizations Description:

City Utilities is a municipally owned utility providing electric, gas, drinking water, transit and telecommunications services to the Springfield metropolitan area. We generate electricity at the James River and Southwest Power Stations via coal-fired steam units and gas and oil-fired combustion turbines. Plant tours include a discussion of environmental regulations affecting plant operations, as well as the technology used to control and continuously monitor air emissions.

CU's Fulbright and Blackman Water Treatment Plants are the largest drinking water works in the region. Plant tours explain the entire treatment process from source water protection to safe drinking water production.

CU also provides educational programs through local schools and civic groups. Many of our curriculum offerings are geared toward resources conservation, especially with respect to water and energy.

City of Republic – Wastewater Treatment Plant

Department Wastewater Treatment Plant
Contact Craig R. Lusby
Position Superintendent
Address 221 N. Main
City Republic, MO 65738
Telephone (417) 732-3460
Fax number (417) 732-3499
Mission areas Waste, water quality
Programs available Regulator

Description:

The primary objective of the *wastewater treatment plant* is to protect the environment and improve the downstream water quality. Raw domestic sewage is treated to remove organic solids (dissolved and suspended) and some inorganic solids. The *treatment plant* accelerates natural processes using bacteria to break down the waste in order to produce clean water.

<u>Mission areas</u>	Interactive health , science geo- culture and environmental education
<u>Programs available</u>	BodyWorks, ScienceWorks, World Wise, Distance Learning and Outreach, Environmental Pathways
<u>Web site</u>	www.discoverycenter.org

Description:

The *Discovery Center of Springfield, Inc.* is an interactive, hands-on museum committed to inspiring people of all ages with a life-long love of learning and an appreciation for the world and our place in it. In addition to promoting respect for the environment, the *Discovery Center* interweaves many forms of science, health, technology, history, art and culture. The museum includes permanent and traveling exhibits, hands-on activities, innovative group programs, summer workshops, video conferencing, web-based activities and curriculum, and special events including the regional hosting of Earth Day festivities. The *Discovery Center* serves as a resource for teachers and parents who wish to utilize the *Center's* broad array of educational programs. Drawing visitors from across the region, the *Discovery Center* enjoys a total market of around 1,000,000 people. Through outreach and after school programming the *Discovery Center* also works closely with social service agencies and Title I schools to provide special programs for the region's "at risk" children.

Greater Ozarks Audubon Society

Contact..... Charley Burwick
Position President
Address..... PO Box 3231
City..... Springfield, MO 65808
Telephone (417) 887-1678
Web site www.greaterozarkaudubon.org
Mission areas..... Wildlife, habitat
preservation/restoration,
nature, biodiversitiy
Programs available..... Advisory, public education
and outreach (slides), field
trips/nature walks

Description:

Local members belong to the National Audubon Society, a group of over 600,000 people who watch birds and are concerned with quality of life topics. Awareness of the interdependence of all living things is raised through the study of birds. The Audubon Society fosters this study and is committed to community service and environmental education for the conservation of wildlife and natural resources.

Slide programs are offered throughout the year on a variety of topics including bird identification, bird feeding, landscaping for wildlife, and building bluebird trails. The *Greater Ozarks Audubon Society (GOAS)* oversees the following conservation programs: South Creek habitat restoration project, two Bluebird trails, a Barn Owl nest box placement program, the GOAS Stream Team, Adopt-A-Street cleanups, and Earth Day cleanups and restoration. GOAS also provides Audubon Adventures, an environmental education program produced by the National Audubon Society, to over 80 elementary classrooms in Springfield and surrounding areas.

Ozark Greenways, Inc.

<u>Contact</u>	Terry Whaley
<u>Position</u>	Executive Director
<u>Address</u>	PO Box 50733
<u>City</u>	Springfield, MO 65805
<u>Telephone</u>	(417) 864-2015
<u>Fax number</u>	(417) 864-1497
<u>Web site</u>	www.ozarkgreenways.org
<u>Mission areas</u>	Preservation of the Ozarks natural heritage through the creation of greenway trails.
<u>Programs available</u>	Membership and volunteer opportunities, committee service, special events, monthly work-day, trail watch

Description:

Ozark Greenways is a citizen's group in the Springfield area who work to conserve natural resources and expand opportunities to enjoy them through the creation of greenway trails. The group works closely with the City of Springfield, Greene County and other governmental and private entities to make greenways a reality. Planning, fund-raising, right-of-way acquisition, trail design and management are all activities of *Ozark Greenways*. The South Creek/Wilson's Creek Greenway, Galloway Creek Greenway and the Frisco Highline Rail-To-Trail are three of the *Ozark Greenways'* projects.

Through *Ozark Greenways, Inc.*, individuals/groups have the opportunity to:

- Become a member
- Volunteer on the trails
- Serve on a committee
- Help with special events
- Join the Trail Watch
- Become a Tree Keeper

Urban Soil Test Rebate, Septic
Tank Pump-out Program, Storm
Water Initiative

Description

James River Basin Partnership is a citizen-based organization working on water quality issues in the James River and Upper White River Basins. Our vision is, “Clean water for you, your children, and your grandchildren.” Our mission is, “Working to protect and improve the water quality in our springs, streams, rivers, and lakes.” We have four goals to meet our mission:

1. Implement water quality evaluation protocol
2. Implement programs to positively impact water quality
3. Increase citizen participation in water quality issues
4. Develop sustainable funding sources

Currently our areas of focus are scientific research, public outreach and education. Our science committee is composed of JRBP board members and members of the local scientific community. Current projects are: Stormwater 319 Project, Nutrient Management Planning, Water Quality Improvement Project: Promote Low Impact Development, Watershed Management Planning, Septic Tank Pump-out, Urban Soil Testing, River Rescue Clean-up, and County-wide Watershed Festival. To achieve public education, JRBP holds membership meetings, produces “Current” newsletter, and hosts other informational events. Community financial support enables us to continue our programs.
