SVC2009-01990	04/29/2009	CLO	3511 S PICKWICK AVE	CABLE
Complainant said that in the last three years the rates on his cable service have gone from about \$24 to just under \$50. He has had no change in services, as a matter of fact, the services have declined. He has basic service plus HBO. His premium (HBO) channels have been reduced from 12 to about half that many. Entertainment channels and educational channels have been reclassified and moved and are no longer available. He said that this is a monopoly and a good example of price gouging. Mediacom has taken away the advantage of competitive pricing and they are preying on citizens. He believes the city needs to take action on the way they are doing business.
