

ATTACHMENT B

HAULED WASTEWATER PERMIT SPECIFIC PERMIT CONDITIONS

VIOLATION OF ANY OF THESE PERMIT CONDITIONS CAN RESULT IN THE SUSPENSION OR REVOCATION OF PERMITTEE DISPOSAL PRIVILEGES

- 1.** Hauled wastewater will normally be accepted from 7:00 a.m. until 5:00 p.m., 7 days per week. Conditionally acceptable wastewater requires prior written approval for acceptance by the City which may restrict time, place, and conditions for acceptance. **An authorized City representative shall be contacted at the Southwest Treatment Plant before the unloading of any conditionally acceptable wastewater and may commence after reviewing all written information accompanying the load.**
- 2.** The City wastewater acceptance structure at the treatment plants will normally allow unloading directly from the outlet device on the haulers vehicle. Any additional hose(s) or special equipment will be the responsibility of the Permittee.
- 3.** Care shall be taken when connecting, disconnecting, or unloading to prevent the spillage of any materials around the hauled wastewater acceptance structure. It is the responsibility of the Permittee and their employees to leave the hauled wastewater structure in satisfactory condition. If necessary, the Permittee, or their appointed staff, shall wash down the area before departing the site, including the cleaning of any City water hose or other equipment used during cleanup.
- 4.** The original hauled wastewater discharge permit shall be kept in the office of the Permittee. Each registered hauling vehicle shall carry a copy of the permit at all times. While on City property a City representative may request to view a copy of a valid City of Springfield hauled wastewater permit at any time which shall be provided by the Permittee.
- 5.** All permittees shall use and complete a City hauled wastewater discharge manifest for each individual generator of hauled wastewater. All loads will require a fully completed hauled wastewater discharge manifest fully identifying:
 - Section 1: Wastewater Identification - Information indicating volume (gallons), type, and source of hauled wastewater.
 - Section 2: Wastewater Generator - Information indicating name, complete address, and telephone number for all pump out locations.
 - Section 3: Wastewater Hauler - Indicating company name, City of Springfield hauled wastewater permit number, vehicle license number, vehicle tank capacity, pump out date, and driver identification and/or signature.
 - The location of discharge - The location of discharge- Indicate the location of disposal at the NW Treatment Plant (Septage Only) or at the SW Wastewater Treatment Plant. There are multiple areas for discharge of hauled wastewater at the SW Wastewater Treatment Plant depending on the type of wastewater being disposed of.

6. A City representative may request additional information concerning the origin and nature of the contents of any registered vehicle. The Permittee shall allow the City to immediately obtain a sample of the wastewater from any vehicle. The Permittee shall comply with all information requests concerning the load. This may include, but is not limited to, the following information: pickup points, volumes, and wastewater characteristics.
7. This permit shall be valid only when all Federal, State, or local permits required by the Permittee for transporting wastewater are valid and current. Permittee vehicle insurance in amounts as required by State law shall be kept current. Expired vehicle insurance coverage may result in the suspension of disposal privileges. The Permittee must possess a valid City of Springfield Business License.
8. The Permittee shall immediately report in writing or by email to the City any changes in business name, ownership, address/telephone number, and registered vehicles. Changes to vehicles include but are not limited to: the modification of previously registered vehicles, the addition of vehicles, vehicles no longer used by the Permittee or Permittee hauled wastewater vehicle license plate number changes.
9. In the case of multiple pump outs included as one vehicle load, if any part of the load that is prohibited or restricted, it shall cause the entire load to be unacceptable for discharge.
10. The City reserves the unconditional right to refuse acceptance of any load or stop an unloading operation in progress at any time. Any City employee may unconditionally refuse to accept a load or stop an unloading in progress.
11. All vehicles used by the Permittee to discharge wastewater to the City shall be registered with the Clean Water Operations. Any vehicle additions, deletions, or modifications shall immediately be reported in writing to the City. The written notification shall include vehicle license number, make, and model of vehicle, tank capacity and the nature of the modifications. **The use of a registered hauled wastewater vehicle for the transportation or storage of hazardous materials, liquid petroleum fuels, waste oil, petroleum derivative wastes, or corrosives is specifically prohibited.**
12. The discharge of any materials defined as restricted wastewaters in Chapter 120 of the Springfield City Code is specifically prohibited. These wastes include but are not limited to; flammables, explosives, corrosives, or wastes with unacceptable elevated levels of metals. Any violation on the part of the Permittee or their representatives with the conditions of this permit, or any portion of Chapter 120, shall be cause for immediate suspension or revocation of the hauled wastewater permit and associated discharge privileges. In addition, such violations shall be cause for legal prosecution by the City under prevailing law.
13. Disposal fees are based on current rates multiplied by the types of hauled wastewater. When applicable, additional charges or fees for laboratory analysis or high strength wastes will be made in accordance with Chapter 120 of the Springfield City Code. Haulers will be invoiced monthly for disposal fees and any additional charges. **Full payment of hauled wastewater invoices and charges are due to the City within thirty (30) days.**
14. Portable toilet wastewaters are considered as a conditionally acceptable hauled wastewater. Under no circumstances will these wastewaters be accepted if they contain any chemical deodorizers that cause upset, interference, or pass through of the treatment processes or facilities. Current Material Safety Data Sheets for all deodorizers used by the Permittee must be kept on file with the City.
