The City of Springfield's Department of Environmental Services is a nationally recognized leader in utility management whose mission is to protect the natural resources of our region for current and future generations.

Environmental Services Principal Engineer
City of Springfield, Missouri

The City of Springfield's Department of Environmental Services is seeking qualified applicants for a Principal Engineer to lead the department’s new Sewer Engineering and Development division. This group is responsible for managing and planning much of Environmental Services’ Capital Improvement Program as well as our world-class Pretreatment and MS4 Stormwater programs.

Environmental Services is responsible for protecting the quality of the water resources in and around Springfield. With over 1,200 miles of extensive and growing sanitary sewer infrastructure, Springfield has an award-winning wastewater collection and treatment system that is widely recognized as one of the most innovative wastewater utilities in the country. In addition, the department is responsible for maintaining compliance with the City’s municipal separate storm sewer system (MS4) stormwater permit and has one of the preeminent MS4 programs in the country. Environmental Services is a department of strong leadership, vision, and innovation that is committed to creating a workplace culture focused on employee happiness and success. In a career with Environmental Services, you will have the opportunity to serve your community doing work that makes a difference every day.
