

# GUIDANCE FOR FULLY VACCINATED INDIVIDUALS

The CDC has updated guidance for individuals who have been fully vaccinated. An individual is considered fully vaccinated when they are 2 weeks out from their last vaccine dose (2nd for Pfizer/Moderna and 1 dose for Johnson & Johnson)

## What's changed if you've been fully vaccinated?

- Fully vaccinated people no longer need to wear a mask or physically distance in any setting.
- If you have been in direct contact with someone who has COVID-19, you do not need to quarantine or get tested unless you have symptoms.
- People who are fully vaccinated can travel safely within the United States.
- Fully vaccinated individuals may travel internationally, but need to pay close attention to the conditions at their destination before traveling.

## What hasn't changed if you've been fully vaccinated?

- Individuals will still be expected to follow guidance and guidelines within their workplace.
- Individuals should continue to monitor for symptoms of COVID-19.
